How Much is Enough, or Too Much?

These are good guidelines for evaluating and comparing foods based on their nutrition labels. The recommendations are for EACH DAY.

FAT

For each 100 calories in a food:

No more than 3g of total fat.

No more than 1g of saturated fat.

As little *trans* fat as possible.

CHOLESTEROL

If your doctor gives you a number, stick to it. Otherwise aim for less than 200mg per day.

SODIUM

Try to stay close to 1500mg.

FIBER

One g for each 100 calories, or:

Women: 25-30g Men: 28-35g

CALCIUM

Aim for 1200mg a day.

For ages 50+, the DAILY needs are: Women-about 1800 calories, and Not more than 60g of fat per day. Men-about 2200 calories, and Not more than 75g of fat per day.

For diabetes, 15g total carbohydrate is 1 portion.

If a food contains more than 6 g of sugar alcohol the quantity must be listed in the carbohydrate section. Excess may cause diarrhea.
